## Classical Measurements in Curved Space-Times (Cambridge Monographs on Mathematical Physics)

Fernando de Felice, Donato Bini

The theory of relativity describes the laws of physics in a given space-time. However, a physical theory must provide observational predictions expressed in terms of measurements, which are the outcome of practical experiments and observations. Ideal for readers with a mathematical background and a basic knowledge of relativity, this book will help readers understand the physics behind the mathematical formalism of the theory of relativity. It explores the informative power of the theory of relativity, and highlights its uses in space physics, astrophysics and cosmology. Readers are given the tools to pick out from the mathematical formalism those quantities that have physical meaning and which can therefore be the result of a measurement. The book considers the complications that arise through the interpretation of a measurement, which is dependent on the observer who performs it. Specific examples of this are given to highlight the awkwardness of the problem.

### **From reader reviews:**

#### **Joseph Woodruff:**

Nowadays reading books be than want or need but also work as a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge your information inside the book in which improve your knowledge and information. The data you get based on what kind of guide you read, if you want drive more knowledge just go with knowledge books but if you want experience happy read one with theme for entertaining like comic or novel. The actual Classical Measurements in Curved Space-Times (Cambridge Monographs on Mathematical Physics) is kind of guide which is giving the reader erratic experience.

#### **Kathi Adamo:**

Do you have something that that suits you such as book? The e-book lovers usually prefer to pick book like comic, quick story and the biggest an example may be novel. Now, why not trying Classical Measurements in Curved Space-Times (Cambridge Monographs on Mathematical Physics) that give your enjoyment preference will be satisfied by means of reading this book. Reading practice all over the world can be said as the way for people to know world considerably better then how they react towards the world. It can't be stated constantly that reading routine only for the geeky particular person but for all of you who wants to become success person. So , for every you who want to start studying as your good habit, you could pick Classical Measurements in Curved Space-Times (Cambridge Monographs on Mathematical Physics) become your current starter.

#### **Brenda Seddon:**

The book untitled Classical Measurements in Curved Space-Times (Cambridge Monographs on Mathematical Physics) contain a lot of information on it. The writer explains your ex idea with easy means. The language is very simple to implement all the people, so do not really worry, you can easy to read it. The book was written by famous author. The author brings you in the new age of literary works. It is possible to read this book because you can read more your smart phone, or program, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site and also order it. Have a nice read.

#### **Shelly Sampson:**

As a student exactly feel bored to help reading. If their teacher questioned them to go to the library in order to make summary for some reserve, they are complained. Just small students that has reading's soul or real their passion. They just do what the teacher want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that studying is not important, boring as well as can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to

reach Chinese's country. So , this Classical Measurements in Curved Space-Times (Cambridge Monographs on Mathematical Physics) can make you feel more interested to read.
