## **Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography** Adaptation Science Interagency Working Group

Federal agencies in the United States are planning for climate change in many ways, including through the design of climate change adaptation actions. Like any iterative planning process, climate adaptation planning includes monitoring and evaluation components so plans and actions can be measured for their overall effectiveness. It is important for program and project managers responsible for designing and implementing climate adaptation actions to be able to monitor and evaluate the success (or at times the failure) of their efforts. Learning from monitoring and evaluating the effectiveness of adaptation actions can help the Federal government adjust their actions and responses accordingly to strengthen the resilience of communities around the Nation. To better support Federal agencies in their coastal climate adaptation planning efforts, the U.S. Global Change Research Program (USGCRP)'s Adaptation Science Interagency Working Group (ASIWG) conducted a search of numerous databases to identify examples of programs and products related to evaluations of coastal climate adaptation actions. The number of evaluations of climate adaptation actions was small, however, and those that had been done focused largely on the early stages of programs and projects. This is not surprising, as most organizations and governments are only beginning to implement climate adaptation planning and actions. To enlarge the set of evaluations for review, the focus was widened to include evaluations of other actions related to climate adaptation (e.g., those related to natural resource management, disaster risk reduction, etc.) and their evaluation resources. This review also explored the literature related to continued monitoring specifically for adaptation planning and actions, since observations and measurements are crucial for successful evaluations. This annotated bibliography presents the results of that review of the relevant peer-reviewed literature and reports from Federal, state, and local governments. It includes journal articles and publicly available reports in addition to a number of guides, websites, tools, and other resources developed for program and project managers interested in planning and conducting evaluations. A glossary of common monitoring and evaluation terms is provided at the end of this document. The ASIWG hopes that this bibliography will be a useful resource for program and project managers looking to inform their decisions on climate change adaptation planning and the evaluation programs that will help ensure their success.

### **From reader reviews:**

#### **Connie Griffin:**

The book Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography can give more knowledge and information about everything you want. Why then must we leave a good thing like a book Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography? A few of you have a different opinion about guide. But one aim in which book can give many info for us. It is absolutely right. Right now, try to closer together with your book. Knowledge or details that you take for that, you could give for each other; it is possible to share all of these. Book Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography has simple shape but you know: it has great and massive function for you. You can search the enormous world by wide open and read a publication. So it is very wonderful.

#### **Christopher Jones:**

The guide with title Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography includes a lot of information that you can find out it. You can get a lot of gain after read this book. This specific book exist new information the information that exist in this guide represented the condition of the world right now. That is important to yo7u to understand how the improvement of the world. This book will bring you throughout new era of the globalization. You can read the e-book with your smart phone, so you can read that anywhere you want.

#### **Eleanor Sotomayor:**

The actual book Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography has a lot associated with on it. So when you make sure to read this book you can get a lot of benefit. The book was compiled by the very famous author. The author makes some research previous to write this book. This particular book very easy to read you may get the point easily after reading this book.

#### **Gloria Wells:**

That e-book can make you to feel relax. This particular book Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography was bright colored and of course has pictures on there. As we know that book Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography has many kinds or genre. Start from kids until youngsters. For example Naruto or Private investigator Conan you can read and think you are the character on there. Therefore not at all of book are generally make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book for you and try to like reading which.
