## **Gliding Mammals of the World** Stephen Jackson

The world's gliding mammals are an extraordinary group of animals that have the ability to glide from tree to tree with seemingly effortless grace. There are more than 60 species of gliding mammals including the flying squirrels from Europe and North America, the scaly-tailed flying squirrels from central Africa and the gliding possums of Australia and New Guinea.

*Gliding Mammals of the World* provides, for the first time, a synthesis of all that is known about the biology of these intriguing mammals. It includes a brief description of each species, together with a distribution map and a beautiful full-color painting.

An introduction outlines the origins and biogeography of each group of gliding mammals and examines the incredible adaptations that allow them to launch themselves and glide from tree to tree.

### **KEY FEATURES**

- \* Includes distribution maps of all species and subspecies.
- \* Each species is accompanied by a beautiful colour painting to show their distinctive features and wonderful diversity in size, color and shape.
- \* Includes an explanation of how gliding mammals glide.
