Integrating the brain makes sense, especially the way it is explained here. We have a right brain (emotional) and a left brain (logical) and when we use both our lives are more balanced, meaningful, and creative. We also have an upstairs and a downstairs brain. Downstairs is the more primitive brain, which is intact at birth. The upstairs brain is under construction during childhood and gets remodeled during adolescence. This guide does not try to be your sassy best friend or your wise grandmother. It is a straightforward how-to guide for common issues parent will face with a typical baby. God blessed some selected people with extraordinary talent. Some people are gifted with this magical talent since their childhood. They're the super genius and really smart. There have been many child prodigies throughout history, and some of them even go on to be prolific adults. Most of them have done more intellectually by that time than we'll do in our entire lifetimes. Raising children is a little different for each generation. The trials you faced growing up are different from the trials your children now face. The world is moving at a faster pace each and every day and it's mind-boggling.
