*The Follies of Globalisation Theory* is an erudite and lively critique arguing that current fashionable preoccupations, such as the concern with spatiality, have generated deep intellectual confusions that stand in the way of a clear understanding of the modern world. It shows how and why these confusions ultimately condemn the globalization theorists themselves to a peculiar and quixotic stance: the more clearly they attempt to articulate their arguments, the more equivocal and evasive those arguments become, yielding at best the intellectual equivalent of an architectural folly.
