Remote Sensing of Coastal Environments (Remote Sensing Applications Series)

Remote Sensing of Coastal Environments (Remote Sensing Applications Series)

As coastal environments around the world face unprecedented natural and anthropogenic threats, advancements in the technologies that support geospatial data acquisition, imaging, and computing have profoundly enhanced monitoring capabilities in coastal studies. Providing systematic treatment of the key developments, **Remote Sensing of Coastal Environments** brings together renowned scholars to supply a clear presentation of the state-of-the-art in this technically complex arena.

Edited by a recipient of the prestigious PECASE award, this book provides unrivaled coverage of the issues unique to coastal environments. It presents the best available data for measuring and monitoring coastal zones and explains how decision makers and resource managers can use this data to address contemporary issues in coastal zone management. The text illustrates the latest developments in active remote sensing, hyperspectral remote sensing, high spatial resolution remote sensing, the integration of remote sensing and *in situ* data, and covers the effects of land-cover and land-use change on coastal environments.

Complete with representative case studies, this authoritative resource provides a timely snapshot of the wide range of remote sensing applications in coastal issues to enhance the understanding of how increasing disturbances to our coastal regions are affecting the ecological dynamics, biological diversity, and ecosystem health of our coastal environments.

From reader reviews:

Stacey Thompson:

As people who live in the actual modest era should be change about what going on or data even knowledge to make all of them keep up with the era that is always change and move forward. Some of you maybe may update themselves by reading through books. It is a good choice for you personally but the problems coming to anyone is you don't know what kind you should start with. This Remote Sensing of Coastal Environments (Remote Sensing Applications Series) is our recommendation so you keep up with the world. Why, because this book serves what you want and need in this era.

Jennifer Newhouse:

Do you one of people who can't read satisfying if the sentence chained inside straightway, hold on guys this specific aren't like that. This Remote Sensing of Coastal Environments (Remote Sensing Applications Series) book is readable by means of you who hate those perfect word style. You will find the data here are arrange for enjoyable studying experience without leaving also decrease the knowledge that want to supply to you. The writer connected with Remote Sensing of Coastal Environments (Remote Sensing Applications Series) content conveys prospect easily to understand by most people. The printed and e-book are not different in the information but it just different available as it. So , do you still thinking Remote Sensing of Coastal Environments (Remote Sensing Applications Series) is not loveable to be your top record reading book?

Dorothy Alvarez:

Do you have something that you like such as book? The e-book lovers usually prefer to choose book like comic, short story and the biggest some may be novel. Now, why not striving Remote Sensing of Coastal Environments (Remote Sensing Applications Series) that give your enjoyment preference will be satisfied by simply reading this book. Reading routine all over the world can be said as the opportunity for people to know world far better then how they react when it comes to the world. It can't be mentioned constantly that reading addiction only for the geeky individual but for all of you who wants to possibly be success person. So , for all of you who want to start reading through as your good habit, you could pick Remote Sensing of Coastal Environments (Remote Sensing Applications Series) become your own personal starter.

Marion Driskell:

Does one one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Try and pick one book that you just dont know the inside because don't judge book by its deal with may doesn't work at this point is difficult job because you are afraid that the inside maybe not as fantastic as in the outside appearance likes. Maybe you answer can be Remote Sensing of Coastal Environments (Remote Sensing Applications Series) why because the wonderful cover that make you consider concerning the content will not disappoint a person. The inside or content is fantastic as the outside as well as cover. Your reading 6th sense will directly guide you to pick up this book.
