The Mysterious Collapse of World Trade Center 7: Why the Final Official Report About 9/11 Is Unscientific and False David Ray Griffin

At 5:20 in the afternoon on 9/11, Building 7 of the World Trade Center collapsed, even though it had not been struck by a plane and had fires on only a few floors. The reason for its collapse was considered a mystery. In August 2008, NIST (the National Institute of Standards and Technology) issued its report on WTC 7, declaring that "the reason for the collapse of World Trade Center 7 is no longer a mystery" and that "science is really behind what we have said." Showing that neither of these claims is true, David Ray Griffin demonstrates that NIST is guilty of the most serious types of scientific fraud: fabricating, falsifying, and ignoring evidence. He also shows that NIST's report left intact the central mystery: How could a building damaged by fire--not explosives--have come down in free fall?

"David Ray Griffin has provided a comprehensive dismantling of NIST's theory about WTC 7, according to which it suffered global collapse because of ordinary building fires. Besides showing that NIST committed massive scientific fraud, Griffin also points out that NIST was able to complete its theory only by affirming a miracle: a steel-framed high-rise building coming down in free fall even though explosives had not been used to remove its columns."--Richard Gage, member of American Institute of Architects; founder of Architects and Engineers for 9/11 Truth

"A definitive study of what happens when political concerns are permitted to override science and the scientific method. With intellectual finesse worthy of a scientist, Griffin shows that NIST's WTC 7 report has no scientific credibility. A must read for all concerned with the restoration of science to its 'rightful place' in our democracy."--John D. Wyndham, Ph.D., Physics, Cambridge University; former Research Fellow at the California Institute of Technology
