Writing Medieval Women's Lives (The New Middle Ages)

Medieval women's history is entering a new stage. In the last thirty years medievalists have recovered the sources about women, and have moved women to the foreground of narratives to view society from their vantage point. The historians in this collection are looking for ways to expand the ways we examine and write about medieval women. They are interested in the great and the obscure, and women from different times and places. All attempt to get closer to the life as lived, personified in individual stories. As such, these essays prompt us to rethink what we can know about medieval women, how we can know it, and how we can write about them to expand our insights.
