The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics) Mary Tiles

A century ago, Georg Cantor demonstrated the possibility of a series of transfinite infinite numbers. His methods, unorthodox for the time, enabled him to derive theorems that established a mathematical reality for a hierarchy of infinities. Cantor's innovation was opposed, and ignored, by the establishment; years later, the value of his work was recognized and appreciated as a landmark in mathematical thought, forming the beginning of set theory and the foundation for most of contemporary mathematics.

As Cantor's sometime collaborator, David Hilbert, remarked, "No one will drive us from the paradise that Cantor has created." This volume offers a guided tour of modern mathematics' Garden of Eden, beginning with perspectives on the finite universe and classes and Aristotelian logic. Author Mary Tiles further examines permutations, combinations, and infinite cardinalities; numbering the continuum; Cantor's transfinite paradise; axiomatic set theory; logical objects and logical types; and independence results and the universe of sets. She concludes with views of the constructs and reality of mathematical structure. Philosophers with only a basic grounding in mathematics, as well as mathematicians who have taken only an introductory course in philosophy, will find an abundance of intriguing topics in this text, which is appropriate for undergraduate-and graduate-level courses.

From reader reviews:

Jason Hill:

Why don't make it to be your habit? Right now, try to prepare your time to do the important act, like looking for your favorite book and reading a publication. Beside you can solve your problem; you can add your knowledge by the book entitled The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics). Try to face the book The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics) as your pal. It means that it can being your friend when you really feel alone and beside associated with course make you smarter than in the past. Yeah, it is very fortunated for you. The book makes you considerably more confidence because you can know anything by the book. So , let us make new experience and also knowledge with this book.

Douglas Barlow:

What do you ponder on book? It is just for students as they are still students or that for all people in the world, the actual best subject for that? Simply you can be answered for that issue above. Every person has various personality and hobby for each and every other. Don't to be compelled someone or something that they don't wish do that. You must know how great in addition to important the book The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics). All type of book would you see on many solutions. You can look for the internet methods or other social media.

Judith Duncan:

Now a day individuals who Living in the era wherever everything reachable by connect to the internet and the resources in it can be true or not require people to be aware of each facts they get. How a lot more to be smart in having any information nowadays? Of course the answer then is reading a book. Studying a book can help folks out of this uncertainty Information particularly this The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics) book because this book offers you rich information and knowledge. Of course the data in this book hundred % guarantees there is no doubt in it you know.

Donna Valdez:

In this age globalization it is important to someone to find information. The information will make you to definitely understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of references to get information example: internet, newspapers, book, and soon. You will see that now, a lot of publisher that print many kinds of book. The particular book that recommended for you is The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics) this publication consist a lot of the information in the condition of this world now. This book was represented so why is the world has grown up. The terminology styles that writer use for explain it is easy to understand. The actual writer made some research when he makes this book. Here is why

this book suited all of you.
