Facets of Modern Biogeochemistry: Festschrift for E.T. Degens

Scientists who have had the opportunity of being associated with Professor Egon T. Degens, to whom this Festschrift is devoted, have been influenced by his ideas on subjects as varied as: extraterrestrial organic matter, origin of life, evolution of organisms, isotope biogeochemistry down to more imminent ones such as the carbon cycle and its implications on climate. This variety is also reflected in the papers in the present volume contributed by colleagues who have known Egon or have worked with him. Egon Theodor Degens was born on April 16, 1928 at Inden, Germany and had his education in Bonn and Wiirzburg. After a stint at the Pennsylvania State University he returned to Wiirzburg to help set up one of the first organic geochemistry laboratories in the world. This laboratory was the breeding ground for some of the eminent organic geochemists at work today. Later, he joined the California Institute of Technology and began his work on stable carbon isotopes, and later on biogeochemical compounds in natural waters. From California he moved on to the east coast, which led to yet another productive phase at the Woods Hole Oceanographic Institution. He was instrumental in the pioneering work carried out by the Woods Hole scientists in the Black Sea which is the largest anoxic basin in the world, and in the Red Sea where the first hydrothermal ore deposits on the seafloor were discovered.

From reader reviews:

Troy Riley:

The e-book with title Facets of Modern Biogeochemistry: Festschrift for E.T. Degens possesses a lot of information that you can learn it. You can get a lot of advantage after read this book. This book exist new knowledge the information that exist in this book represented the condition of the world today. That is important to yo7u to understand how the improvement of the world. This kind of book will bring you with new era of the glowbal growth. You can read the e-book on your own smart phone, so you can read that anywhere you want.

Roger Cooper:

Are you kind of occupied person, only have 10 as well as 15 minute in your moment to upgrading your mind ability or thinking skill possibly analytical thinking? Then you are having problem with the book as compared to can satisfy your limited time to read it because pretty much everything time you only find book that need more time to be examine. Facets of Modern Biogeochemistry: Festschrift for E.T. Degens can be your answer because it can be read by anyone who have those short extra time problems.

Robert Young:

Beside that Facets of Modern Biogeochemistry: Festschrift for E.T. Degens in your phone, it can give you a way to get nearer to the new knowledge or information. The information and the knowledge you might got here is fresh through the oven so don't possibly be worry if you feel like an previous people live in narrow village. It is good thing to have Facets of Modern Biogeochemistry: Festschrift for E.T. Degens because this book offers to you readable information. Do you occasionally have book but you would not get what it's all about. Oh come on, that will not end up to happen if you have this with your hand. The Enjoyable option here cannot be questionable, such as treasuring beautiful island. Use you still want to miss that? Find this book and also read it from at this point!

Lee Wing:

Don't be worry in case you are afraid that this book may filled the space in your house, you will get it in e-book means, more simple and reachable. That Facets of Modern Biogeochemistry: Festschrift for E.T. Degens can give you a lot of buddies because by you looking at this one book you have issue that they don't and make you more like an interesting person. This specific book can be one of one step for you to get success. This book offer you information that perhaps your friend doesn't know, by knowing more than additional make you to be great folks. So , why hesitate? Let's have Facets of Modern Biogeochemistry: Festschrift for E.T. Degens.
