Major Criminological Theories: Concepts and Measurement (Wadsworth Series in Criminological Theory) Liqun Cao

The book is a reference/text book in one. It criticizes the current bifurcation of theory and methodology and presents the history of scientific criminology. It then describes briefly each major criminological theory and lists how the key concepts of each of these theories are measured. All the major studies that test these theories are reviewed and evaluated. The book may serve as a reference book or a guideline in testing criminological theories. The book itself does not make attempts to advance any new theory, but tries to make a contribution to the criminological literature by strengthening the testability of existing criminological theories. That is, it contributes to the construction of a more scientific approach to criminology, and it allows for a more penetrating analysis of existing problems of scientific criminology and of the ways to address these problems.
